Duration: 2.5 Months

- Managed website content updates and social media activities.
- Designed web interface mockups using Figma.
- Provided IT support and assisted with administrative documentation.

Languages

- English
- Urdu
- Pashto

Projects

ToolBench — Browser-Based Online Utilities

Live: toolbench.cc

Technologies: Next.js, React, JavaScript, HTML, CSS

- Developed and deployed a browser-based collection of productivity utilities, including PDF, image, QR code, JSON, and file-related tools.
- Built responsive and user-friendly interfaces with a focus on performance and accessibility.
- Implemented client-side processing for tools where files can be handled directly in the browser without requiring server uploads.
- Worked on SEO optimization, routing, metadata, and production deployment.
- Managed the project using Git/GitHub and resolved build, dependency, and routing issues during development.

Asim Trading Hub — Business Website

Live: asimtradinghub.com

Technologies: HTML, CSS, JavaScript, PHP

- Designed and developed a professional business website for a trading-related company.
- Created responsive layouts and structured pages for presenting company information, services, and contact details.
- Focused on clean UI, mobile responsiveness, usability, and SEO-friendly page structure.
- Deployed the website to a live domain and handled website configuration and updates.

Text-to-Speech Python Program

- Developed a text-to-speech application using Python.

Temperature & Humidity Sensor System

- Built an Arduino-based monitoring system using temperature and humidity sensors.

Frontend Web Development Projects

- Developed responsive web pages using HTML, CSS, Bootstrap, and Tailwind CSS.
- Currently building React.js projects and learning component-based UI development.
- Practicing state management and modern frontend development concepts.
